

WITHUM CFI/E-DISCOVERY® – AN EXCLUSIVE CAPABILITY

Reducing Costs And Empowering Better Decision-making.

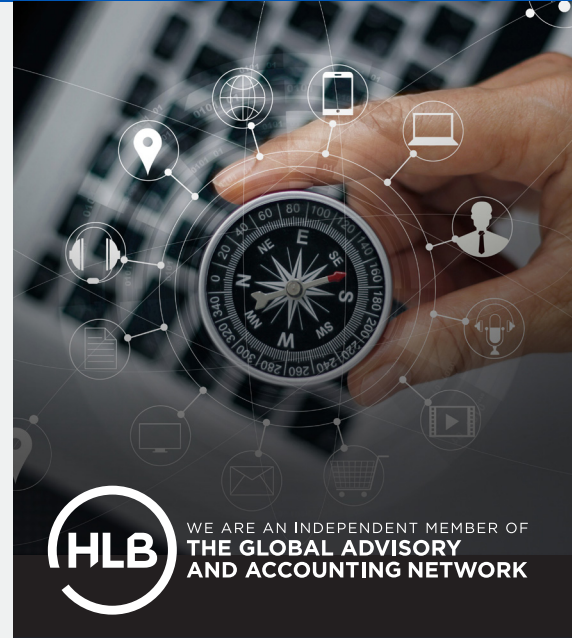

There aren't too many instances when a company can actually offer something that's truly unique, something none of our competitors have, something that just doesn't exist elsewhere on the market – and save you money in the process. That's Withum CFI/e-Discovery®.

Withum CFI/e-Discovery® offers an integrated suite of powerful solutions that enable your organization to address virtually any e-Discovery, cyber forensics investigation or security incident both proactively and reactively. As a result, you're able to make well-informed decisions when incidents occur, and better able to minimize their cost and impact. Withum CFI/e-Discovery® utilizes a comprehensive 3-dimensional approach, analyzing cross-channel input and taking multi-disciplinary considerations into account, thereby eliminating tunnel vision. The result is delivery of a powerful decision-making matrix that expands your organization's options on its most sensitive matters, criminal or civil proceedings, regulatory issue resolution, audits, and internal and external misconduct investigations.

Withum's global experts work cooperatively to support internal or external counsel, senior leadership and operational teams. We ensure strict confidentiality throughout investigative and reporting processes, and bring an objective and impartial perspective to every situation. This can be especially important in determining whether the incident is caused by an external adversary or by an employee, whether through error or intentionally.

Withum CFI/e-Discovery® can be provided either on an external or insured basis. It's designed to significantly reduce your organization's e-Discovery spending, accelerate your incident response capability, and enhance your internal audits and information security posture.

MAKE WELL-INFORMED DECISIONS WHEN INCIDENTS OCCUR AND MINIMIZE YOUR COST AND IMPACT WITH WITHUM CFI/E-DISCOVERY®.
