

Aurora Security™ has combined practices with Withum to bring solutions and services developed and delivered by security industry experts.

We believe the greatest value we can provide is to “do it once and do it right.”

CYBER INVESTIGATIONS/LEGAL SUPPORT

STRATEGIC CYBER FORENSICS AND INVESTIGATIONS.

You need to manage an incident proficiently, minimize immediate business impact, and identify various courses of action while ensuring objective and proper evidence identification, collection and preservation.

BREACH INVESTIGATIONS. You believe your business has been breached. You need to understand multi-dimensional concerns, explore several options, develop a best plan of action, and put objective and genuine global expertise to use.

FORENSIC DATA COLLECTION. You need to provide confidential forensically sound data snapshots of computers or complex network systems without business disruption.

ADVANCED DATA RECOVERY. You need to retrieve important lost data from typical to sophisticated data storage devices or systems.

CERTIFIED FORENSIC DATA DESTRUCTION. You need targeted or complete data destruction assurance by experienced global network forensic experts to help ensure information is irrecoverable on specific systems, devices or throughout the enterprise.

SECURITY ASSESSMENT

PENETRATION TESTING. You wish to ensure critical applications, IT infrastructure and devices are resistant to compromise.

VULNERABILITY ASSESSMENT. You wish to ensure applications, IT infrastructure and devices meet a minimum security baseline.

SOCIAL ENGINEERING AND PHYSICAL SECURITY ASSESSMENT. You wish to protect business assets from unauthorized physical access and manipulation.

NETWORK ARCHITECTURE SECURITY ASSESSMENT. You wish to ensure unprivileged network threats will not compromise the network or network assets.

INFORMATION SECURITY MANAGEMENT SYSTEM ASSESSMENT. You wish to ensure a proficient organization protection strategy and implementation plan is in place, is operating as expected, and is cost effective.

SITE HEALTH CHECK. You wish to determine the risk state of a business, business unit, partner, and merger or acquisition target.
